PROFILE

Software Engineering graduate (First Class Honours, Lancaster University) with hands-on experience in agentic AI deployment and LLM evaluation. Deployed AI agent solutions in enterprise environments; conducted 600+ structured evaluations of frontier LLM and agentic AI systems using evaluation frameworks and observability analysis across agent loops, tool use, and autonomous decision-making. Proficient with Claude Code and MCP-based architectures; covers the full SDLC from requirements to deployment. Fluent in English (C1) and German (B2), with international experience across five countries.

PROFESSIONAL EXPERIENCE

Stumpp Schuele & Somappa Springs — Bangalore, India | Apr 2026 – Present
Junior IT Project Manager

- Designed and deployed **LLM-based agentic AI** solutions automating cross-plant workflows through structured rule sets; improved operational efficiency by **40%** across 20 manufacturing facilities
- Delivered a full-stack digital platform (Python, SQL, Next.js) across the complete **SDLC** : requirements analysis, architecture, deployment, and live process management across 20 plants
- Translated business intent into precise **agent specifications** and led **cross-functional stakeholder** engagement to ensure compliant, scalable delivery

Browserbase — Remote | Feb 2026 – Present
AI Model Evaluation Contractor

- Conducted **600+ structured evaluations** of frontier **LLM** and **agentic AI** systems, systematically assessing **agent loops** , tool use, reasoning, and autonomous decision-making across diverse use cases
- Applied **evaluation frameworks** and **observability** analysis to identify edge cases, failure patterns, and reliability gaps in **AI-native architectures** ; produced reports that directly informed AI quality improvements
- Developed grounded, practical understanding of **AI coding agent** capabilities and **governance** requirements through large-scale, hands-on evaluation work

Carl Zeiss AG — Oberkochen, Germany | Nov 2024 – Aug 2025
Working Student – Data & Analytics

- Identified reporting inefficiency and led migration to a centralized **Power BI** dashboard, cutting reporting cycle time by **50%** across a global budget tracking initiative
- Coordinated a team of 5 **cross-functional** interns, managing task prioritization, workload distribution, and delivery to project leadership
- Designed **automated data pipelines** and analytics dashboards supporting **data-driven** decision-making across a global enterprise programme

Carl Zeiss AG — Oberkochen, Germany | Jun 2024 – Aug 2024
Intern – Digital Transformation

- Contributed to **business analysis** during a **SAP-to-Salesforce** migration, developing a **Power BI** KPI dashboard to monitor NPS and track digital transformation outcomes
- Gathered and documented **stakeholder requirements** , managed platform access, and delivered **data-driven** reports to global project leadership

Carl Zeiss BV — Breda, Netherlands | Jul 2023 – Aug 2023
Operations Intern

- Produced technical documentation for platform infrastructure; supported digital operations across sales and inventory workflows

Carl Zeiss Mexico — Mexico City, Mexico | Aug 2022 – Sep 2022
Marketing Intern

- Developed a **data-driven** marketing campaign for a medical product, increasing social media reach by 5%

EDUCATION

Lancaster University — Leipzig, Germany | Oct 2021 – Jul 2025
BSc Software Engineering — First Class Honours (18.0)

SKILLS & LANGUAGES

AI & Agents: Claude Code • MCP • Agentic AI Evaluation • LLM Evaluation Frameworks
Programming: Python • SQL • JavaScript • TypeScript • Java
Tools: Power BI • SAP Analytics • Salesforce • Git • React
Languages: Spanish (Native) • English (C1) • German (B2) • French (B1)

ADDITIONAL

Personal Investment Portfolio: independently managed achieving 20%+ cumulative return, applying data-driven analysis to asset
