PROFILE

Digitalization-focused Software Engineering graduate (First Class Honours) with hands-on experience in AI-driven process optimization, business analysis, and digital solution deployment across global enterprise environments. Conducted 600+ structured AI evaluations and delivered data analytics solutions for cross-functional stakeholder teams. Combines strong analytical and communication skills with multilingual fluency across four languages and international experience spanning five countries.

PROFESSIONAL EXPERIENCE

Stumpp Schuele & Somappa Springs — Bangalore, India | Apr 2026 – Present
Junior IT Project Manager

- Led **stakeholder engagement** and **business requirements** gathering to design and deploy an **AI agent solution** , automating cross-plant workflows and improving operational efficiency by **40%** across 20 facilities
- Identified **digitalization opportunities** and built a full-stack digital solution (Python, SQL, Next.js) enabling real-time **process management** and coordination across 20 manufacturing sites in India
- Acted as **bridge between business and technical teams** , translating requirements into scalable digital solutions and supporting continuous improvement through structured feedback loops

Browserbase — Remote | Feb 2026 – Present
AI Model Evaluation Contractor

- Conducted **600+ structured evaluations** of **GenAI** and frontier AI systems, assessing model behavior across business-relevant use cases including reasoning, **automation** , and decision-making
- Delivered **analytical reports** identifying failure patterns and reliability gaps, directly informing AI quality improvements — demonstrating applied understanding of AI capabilities and limitations

Carl Zeiss AG — Oberkochen, Germany | Nov 2024 – Aug 2025
Working Student – Data & Analytics

- Identified **process inefficiency** in manual reporting and led migration to a centralized **Power BI** dashboard, cutting reporting cycle time by **50%** across a global budgeting initiative
- Coordinated a team of 5 **cross-functional** interns, managing task prioritization, workload distribution, and delivery to project leadership
- Designed **automated data pipelines** and analytics reports to support **strategic decision-making** across a global **digital transformation** programme

Carl Zeiss AG — Oberkochen, Germany | Jun 2024 – Aug 2024
Intern – Digital Transformation

- Contributed to **business analysis** efforts during a **SAP-to-Salesforce digital transformation** , developing a **Power BI** KPI dashboard to monitor Net Promoter Score and track process outcomes
- Gathered and documented **stakeholder requirements** , managed platform access, and delivered **data-driven reports** to global project leadership

Carl Zeiss BV — Breda, Netherlands | Jul 2023 – Aug 2023
Operations Intern

- Produced technical documentation for platform infrastructure; supported **digital operations** across sales and inventory management workflows

Carl Zeiss Mexico — Mexico City, Mexico | Aug 2022 – Sep 2022
Marketing Intern

- Developed a **data-driven** marketing campaign for a medical product, increasing social media reach by 5%

EDUCATION

Lancaster University — Leipzig, Germany | Oct 2021 – Jul 2025
BSc Software Engineering — First Class Honours (18.0)

SKILLS & LANGUAGES

Programming: Python • SQL • JavaScript • TypeScript • Java
Tools: Power BI • Microsoft Excel • SAP Analytics • Salesforce • Tableau • Git • React
Languages: Spanish (Native) • English (C1) • German (B2) • French (B1)

ADDITIONAL

Personal Investment Portfolio: independently managed achieving 20%+ cumulative return, applying data-driven analysis to asset allocation (Mar 2025 – Present)
